DETAILED ACTION

Election/Restrictions

1. Responsive to the requirement for election of species, applicants have elected the 19th compound in claim 16, a compound where G is a substituted phenyl group, Ar is naphthylene, X is pyridyl, Y is CH₂ and Z is morpholinyl. Claims 1-23 are readable thereon.

Specification

2. The status paragraph on page 1 of the specification is incomplete. Correction is requested.

Improper Markush Rejection

3. Claims 1-23 are rejected as being improper Markush claims in the definition of the G, Ar, X and Z groups as carbocyclic rings and diverse heterocyclic rings; and Z as (1) rings and (2) various functional groups. So substituted, the resulting total compounds lack a common core and are structurally diverse and patentably distinct one from the others. Three- and four-ring containing compounds, and carbocyclic and various heterocyclic compounds are involved. Diverse fields of search are also involved. Limitation of the claims to compounds where Z is a ring (four-ring containing compounds), and at least one of the rings is a heterocyclic ring, encompassing the elected species, will overcome this rejection.
